PLOS Publication Fee Assistance

To whom it may concern,

I am requesting a full waiver of the publication fee for my manuscript “A Pre-Registered Direction Instability Atlas Across Three Perturbation Modalities,” submitted to *PLOS Computational Biology*.

I am an independent researcher with no institutional or departmental affiliation. I hold no grants, have no access to institutional publication funds, and receive no research funding of any kind. I am currently unemployed and have no personal financial resources available to cover publication fees.

I have investigated all possible funding sources and confirm that none are available to me. I would be grateful for any fee reduction or waiver that PLOS is able to provide.

Thank you,

Elliot Tower
